

Membrane Installation Kit

Product Overview

The Polyguard Membrane Installation Cart, is designed to assist installation of our highway and bridge deck membranes in a quick and efficient manner. The carts is adjustable for widths from 12" – 48". The top rail holds the roll of membrane while the bottom rail applies tension while the membrane is applied. Typically a two person job with one person directing the cart over the bridge deck or joint/crack, and the other gathering the release liner.

Efficient and simple membrane application

Readily adjustable to accommodate membrane width

Great for high volume projects

Easy to break down and transport
